in Møre Boligkreditt AS. At the end of the first quarter, paid in equity and retained earnings amounted to NOK 1,674 million (NOK 1,603 million). Risk weighted assets amounted to NOK 7,785 million (NOK 8,129 million). Net equity and subordinated loan capital amounted to NOK 1,588 million at end-March 2024 (NOK 1,516 million). Outlook

From March 2023 to March 2024 the Norwegian Consumer Price Index (CPI) increased by 3.9 per cent, while the CPI adjusted for tax changes and excluding energy products (CPI-ATE) rose by 4.5 per cent. CPI levels are down from last quarter, and slightly below Norges Bank's projections, but still above the long-term inflation target of 2 per cent. The weak Norwegian krone still adds to pressure on inflation levels through imported goods and services.

Unemployment levels in Norway remain low. In March 2024, the national level of registered unemployment was 2.0 per cent, compared to 1.8 per cent in the county of Møre og Romsdal.

Norges Bank has kept the policy rate unchanged so far this year, and the rate path from the central bank indicates that the policy rate will stay at 4.5 per cent for the larger part of 2024.

National twelve-months growth in household loan debt is declining and reported at 3.2 per cent in February 2024. This is the lowest growth level since the mid 1990's. National housing prices increased by 0.6 per cent in March 2024, seasonally adjusted, and are up by 1.2 per cent the last twelve months.

The Board expects to see a further dampened growth in household debt going forward, due to both the effect of increased mortgage interest rate levels and the general increase in household costs. The 2024 frontline sector salary settlement agreement of 5.2 per cent increase is expected to increase household purchasing power. Unemployment levels, both on a national level and in the county of Møre og Romsdal, are expected to increase somewhat in the coming quarters, but still stay at low levels. The Board expects moderate growth in housing prices in 2024.

Note 4

Impairment, losses and non-performance

Møre Boligkreditt AS applies a three-stage approach when assessing ECL on loans to customers in accordance with IFRS 9.

- Stage 1: At initial recognition and if there's no significant increase in credit risk, the commitment is classified in stage 1 with 12-months ECL.
- Stage 2: If a significant increase in credit risk since initial recognition is identified, but without evidence of loss, the commitment is transferred to stage 2 with lifetime ECL measurement.
- Stage 3: If the credit risk increases further and there's evidence of loss, the commitment is transferred to stage 3.

Staging is performed at account level and implies that two or more accounts held by the same customer can be placed in different stages.

Financial instruments

CLASSIFICATION AND MEASUREMENT

The company's portfolio of financial instruments is at initial recognition classified in accordance with IFRS 9. Financial assets are classified in one of the following categories:

- Amortised cost
- Fair value with any changes in value through the income statement

The classification of the financial assets depends on two factors:

- The purpose of the acquisition of the financial instrument
- The contractual cash flows from the financial assets

Financial assets measured at amortised cost

The classification of the financial assets assumes that the following requirements are met:

- The asset is acquired to receive contractual cash flows
- The contractual cash flows consist solely of principal and interest

With the exception of fixed rate loans, all lending and receivables are recorded in the accounts at amortised cost, based on expected cash flows. The difference between the issue cost and the settlement amount at maturity, is amortised over the lifetime of the loan.

Financial liabilities measured at amortised cost

Debt securities, including debt securities included in fair value hedging and loans and deposits from credit institutions, are measured at amortised cost based on expected cash flows.

Financial instruments measured at fair value, any changes in value recognised through the income statement

The company's portfolio of bonds in the liquidity portfolio is classified at fair value with any value changes through the income statement, based on the business model of the company.

The portfolio of fixed interest rate loans is measured at fair value to avoid accounting mismatch in relation to the underlying interest rate swaps.

Financial derivatives are instruments used to mitigate any interest- or currency risk incurred by the company. Financial derivatives are recorded at fair value, with any changes in value through the income statement, and recognised gross per contract, as either asset or debt.

Changes in basis swaps effects for swaps included in fair value hedging are recognised in OCI.

Losses and gains as a result of value changes on assets and liabilities measured at fair value with any value changes being recognised in the income statement, are included in the accounts during the period in which they occur.

LEVELS IN THE VALUATION HIERARCHY

Financial instruments at fair value are classified into different levels based on the quality of market data for each type of instrument.

Level 1 – Valuation based on prices in an active market

Level 1 comprises financial instruments valued by using quoted prices in active markets for identical assets or liabilities. This category includes bonds and certificates in LCR-level 1, traded in active markets.

Level 2 – Valuation based on observable market data

Level 2 comprises financial instruments valued by using information which is not quoted prices, but where prices are directly or indirectly observable for assets or liabilities, including quoted prices in inactive markets for identical assets or liabilities. This category mainly includes derivatives and bonds which are not included in level 1.

Level 3 – Valuation based on other than observable market data

Level 3 comprises financial instruments which cannot be valued based on directly or indirectly observable prices. Loans to customers are included in this category.

A change of 10 basis points in the discount rate will have an effect of approximately NOK 4.8 million on the valuation of the fixed rate loans as at 31.03.2024.
